InterSystems

× [1]

Our data management and integration platform, along with our powerful healthcare solutions, keeps health and social care providers, application vendors, and device manufacturers all on the same page. We currently help Boards to manage the health of over 90% of the patient population and connect information and processes between numerous applications and organisations across the country. Also, our health informatics platform is used as an inter-agency service to share information.

This common foundation of operational systems makes InterSystems an ideal partner to support new types of strategic interoperability initiatives, to further the digital maturity of health and social care, improve outcomes, along with the user and patient experience. Because empowering healthcare to improve care matters.

Panel Session Sponsors

Tunstall

× [4]

Tunstall is a provider of strategic, innovation-led Connected Care and Health solutions. For over 60 years we have pioneered the development of technology that enables independent living and continual care and health monitoring for over five million people and their families across the world. Working across the health, housing and care landscape, we support progressive, empowering, person-centred care.

Tunstall is a lead partner in the Next Generation Solutions for Healthy Ageing cluster, which is being led by Digital Health & Care Institute Scotland as part of its activities to support the Scottish Government's TEC Programme and the Digital Telecare Workstream.

Exhibitor

Cambric Systems

 [6]

Cambric Systems Limited is a trusted supplier of powerful, flexible and intuitive healthcare software solutions to the NHS.

Our latest innovation, the community healthcare platform 'Morse', is currently being deployed throughout many NHS health boards in Scotland.

For over twenty years, we have worked closely with stakeholders at every level of the NHS, garnering valuable insights into the unique and complex challenges faced by healthcare services when upgrading to digital systems and processes.

We maintain a pro-active approach to product enhancement and bespoke developments throughout the lifecycle of our products which has earned us a reputation for excellence in both product quality and customer service.

Inhealthcare

 [9]

Inhealthcare is the UK leader in digital health and remote patient monitoring. As well as being the digital health provider of choice for Scotland, Inhealthcare delivers its services across major towns and cities in Northern Ireland, England and Wales.

Our technology is designed to support vulnerable high-risk patients, including those in care homes, and patients living with long-term conditions such as diabetes, COPD and heart failure. We also support patients with short-term conditions such as pre-eclampsia, IBS and gestational diabetes.

We have a marketplace of more than 100 clinically designed digital health services or alternatively, we work with organisations to build new services for their population's health needs.

Voice Technologies

 [11]
Voice Technologies is an award-winning, employee-owned software provider based in Paisley (near Glasgow) and Sheffield in the UK. We help organisations to reduce the time and cost of producing correspondence by using information and mobile workflow, speech recognition and digital dictation applications.

Our team of in-house specialists develops innovative software including the award-winning WinVoicePro, a document creation and workflow management application, and FormStream, web-based e-forms for paperless documentation.

We provide products and applications with industry-leading partner companies including Philips, Olympus and Nuance, and we are a Microsoft Silver Application Developer.
